NOTES:

¹**Available Conflict Assessment:** Conflict Assessment is available in the Software Distribution Suite as an optional add-on.

²**Deployment to AD / NDS / NT Users & Groups** The 8.7 release enables scheduling to machines containing profiles for any specified user, rather than to the account under which the agent is running.

³**Wake On LAN** Basic Wake On LAN enables transmission of WOL messages to selected workstation(s) as an operation separate and discrete from other WinINSTALL tasks such as distribution of a package.

⁴**Advanced Wake On LAN** Advanced Wake On LAN is the ability to integrate WOL with any scheduled task.
